

I am asking that you do not change the current law regarding telephone privacy and unwanted solicitation by phone. My husband has a terminal illness and the peace and quiet in the evenings since we signed up for no calls have been a god send. The number of calls have been drastically reduced to less than 10% the amount of calls that we used to get. Please, Please don't allow these people to start bothering us again. If I need someone's service, I'll call them. Thank You.
